SUMMARY

Frontend React and Javascript Developer with early-career experience delivering React-based digital solutions for local businesses. Designed and launched two production SaaS platforms. Seeking to apply React expertise to drive product development and client success.

SKILLS

React, JavaScript, TypeScript, React Hooks, React Router, TailwindCSS, Node.js, Express, MongoDB, REST APIs, Git, Next.js, PostgreSQL, MySQL

PROJECTS

Tally https://t-ally.vercel.app/
- NextJS web app designed to track every expense and income to give you feedback using AI.
- Designed it based on real life needs most people have, intending to make saving easier.

Stride Mobility App https://github.com/Jetsil2311/stride
- React Native pedestrian navigation app that maps safe walking routes for urban explorers using Mapbox, PostGIS, and real-time hazard alerts
- Architected full-stack mobile solution with Expo, Supabase/PostGIS spatial data, and NativeWind

Bubble Kaapeh Brand Identity https://www.instagram.com/bubblekaapeh
- Local café branding project.
- Designed visual identity + growth strategy.

WORK EXPERIENCE

Self-Employed **Feb 2026 - Present**

Developed and tailored solutions for multiple businesses
- Designed and built two production SaaS platforms using React, Express, and NativeWind, enabling local businesses to accept online orders
- Built and launched a React.js digital menu and online ordering platform for Bubble Kaapeh, deployed on Vercel and adopted by 5+ restaurant and café clients, boosting their efficiency on an every-day basis.
